AND BLOWER
FUNCTION

Makita

MODEL: VC015GZ

40VMAX XGT BRUSHLESS COMPACT DUST EXTRACTOR / BLOWER

// VC015GZ

- ❖ **Compact Design:** High-speed motor design allows a reduced airflow passage, resulting in a smaller overall footprint while maintaining effective suction for everyday site cleaning.
- ❖ **Suction Performance:** Powerful brushless motor delivers stronger suction than the previous 18V model, supporting efficient dust collection across a wide range of tasks.
- ❖ **Dust Collection System:** Large-capacity 18L dust bag supports longer cleaning intervals, with a folded inner fabric design that helps reduce dust leakage during use and disposal.
- ❖ **Wireless Tool Control:** AWS (Auto-start Wireless System) compatibility enables automatic operation when connected to compatible tools, improving convenience and efficiency during dust-generating applications.
- ❖ **Low Noise Operation:** Integrated silencer in the dust bag and vibration-damping around the motor reduce noise and vibration for controlled high-speed operation.
- ❖ **Versatility:** Supports dry dust collection only and includes blower functionality, with compatibility for $\phi 28\text{mm}$ hose attachments to suit a range of applications.

SPECIFICATIONS

40VMAX BRUSHLESS 150MM METALCUTTER

// CS004GZ

- ❖ **Cutting Performance:** High cutting capacity supports metal sections up to 57.5mm when fitted with a 150mm blade, delivering smooth single-stroke cutting even in heavy-duty materials such as angle steel.
- ❖ **Constant Speed Control:** Maintains stable blade speed under load, supporting smooth cutting performance during continuous metal cutting tasks.
- ❖ **Thermal Management:** Efficient swarf removal helps keep the cut cool, reducing heat buildup and improving cut quality.
- ❖ **Dust Extraction Capability:** An optional dust cap allows connection to a vacuum system for improved debris management and a cleaner working environment. With the appropriate blade and dust cap installed, the tool can also be used for wood cutting.
- ❖ **Safety & Visibility:** Active Feedback Sensing Technology (AFT) helps reduce kickback by stopping the motor when a sudden drop in blade speed is detected, while dual LED job lights with pre- and after-glow improve cut-line visibility in low-light conditions.

SPECIFICATIONS

Blade Diameter	150MM
No Load Speed	4,200 RPM
